

Your Automation Experience with BrainOS

Adopting new technologies and processes can be challenging. But with the right partner and the right approach, you can remove complexities and start realizing the full benefits of automation more quickly. Brain Corp is here as your robotics automation partner to help you on your journey of making your operations smarter.

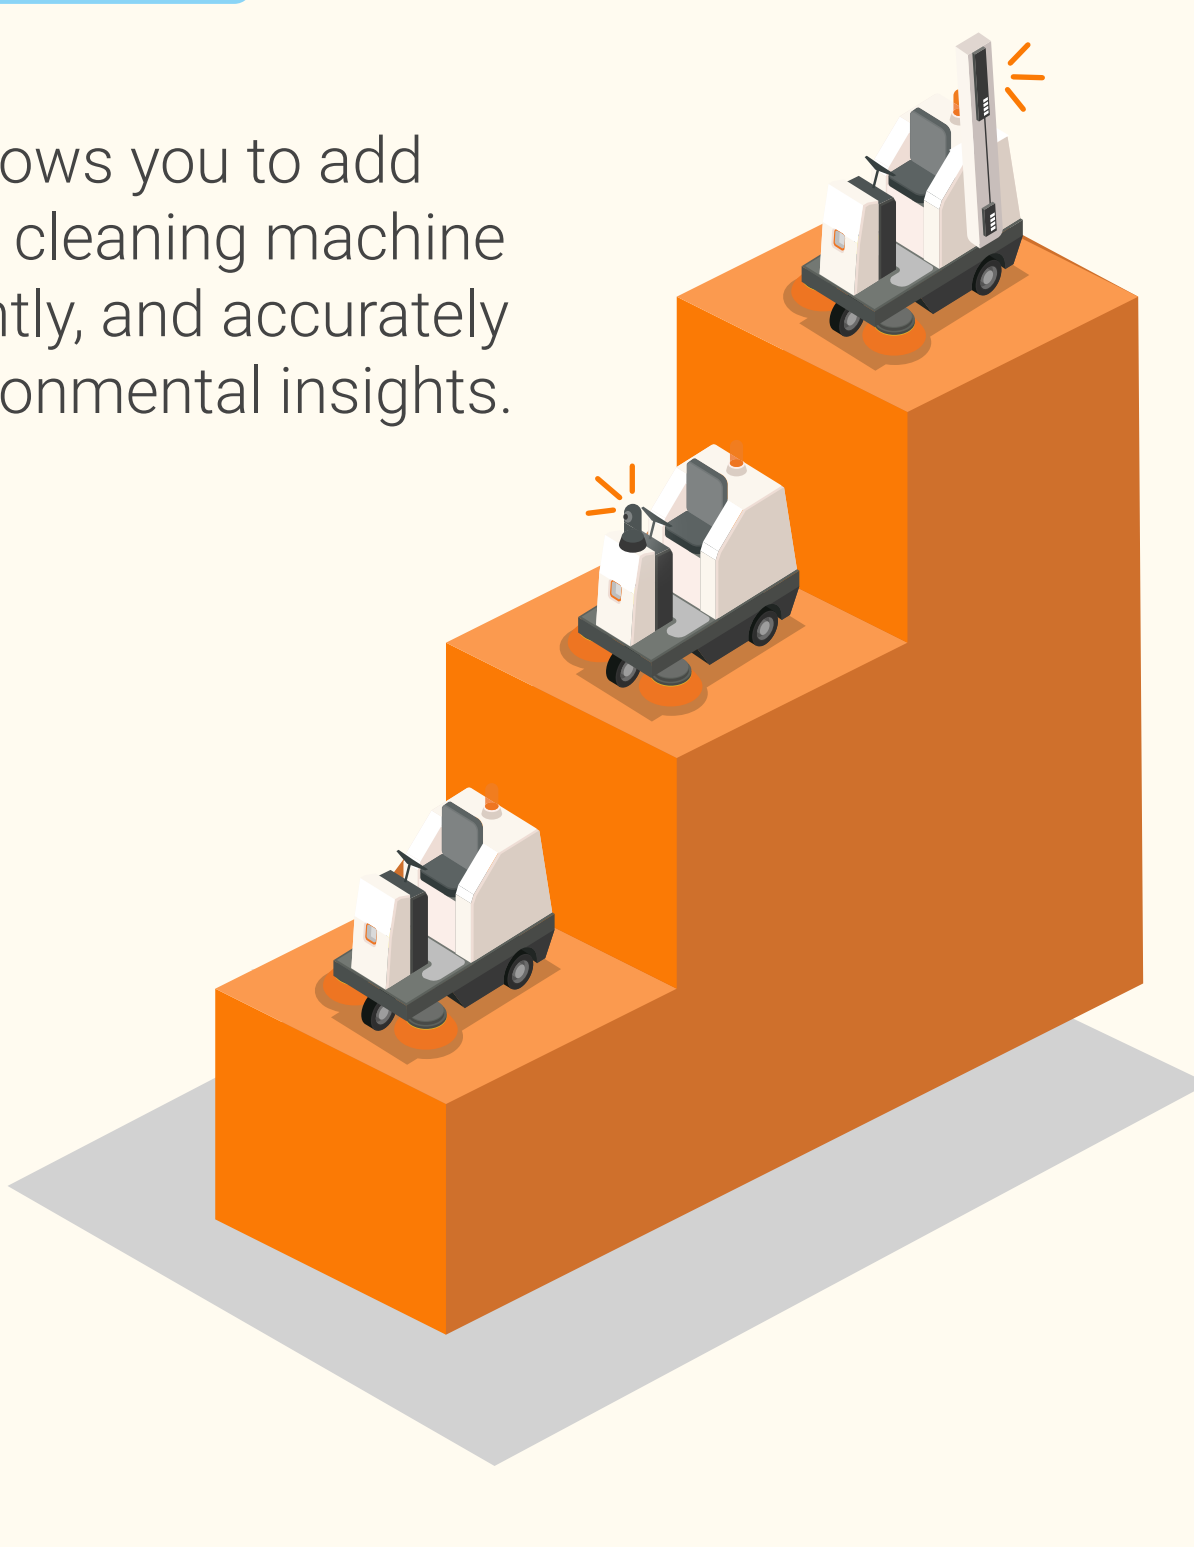

A 'Clean' Start

BrainOS powered autonomous floor scrubbers and vacuums provide an easy, consistent and measurable cleaning solution that works seamlessly with your employees and facility.

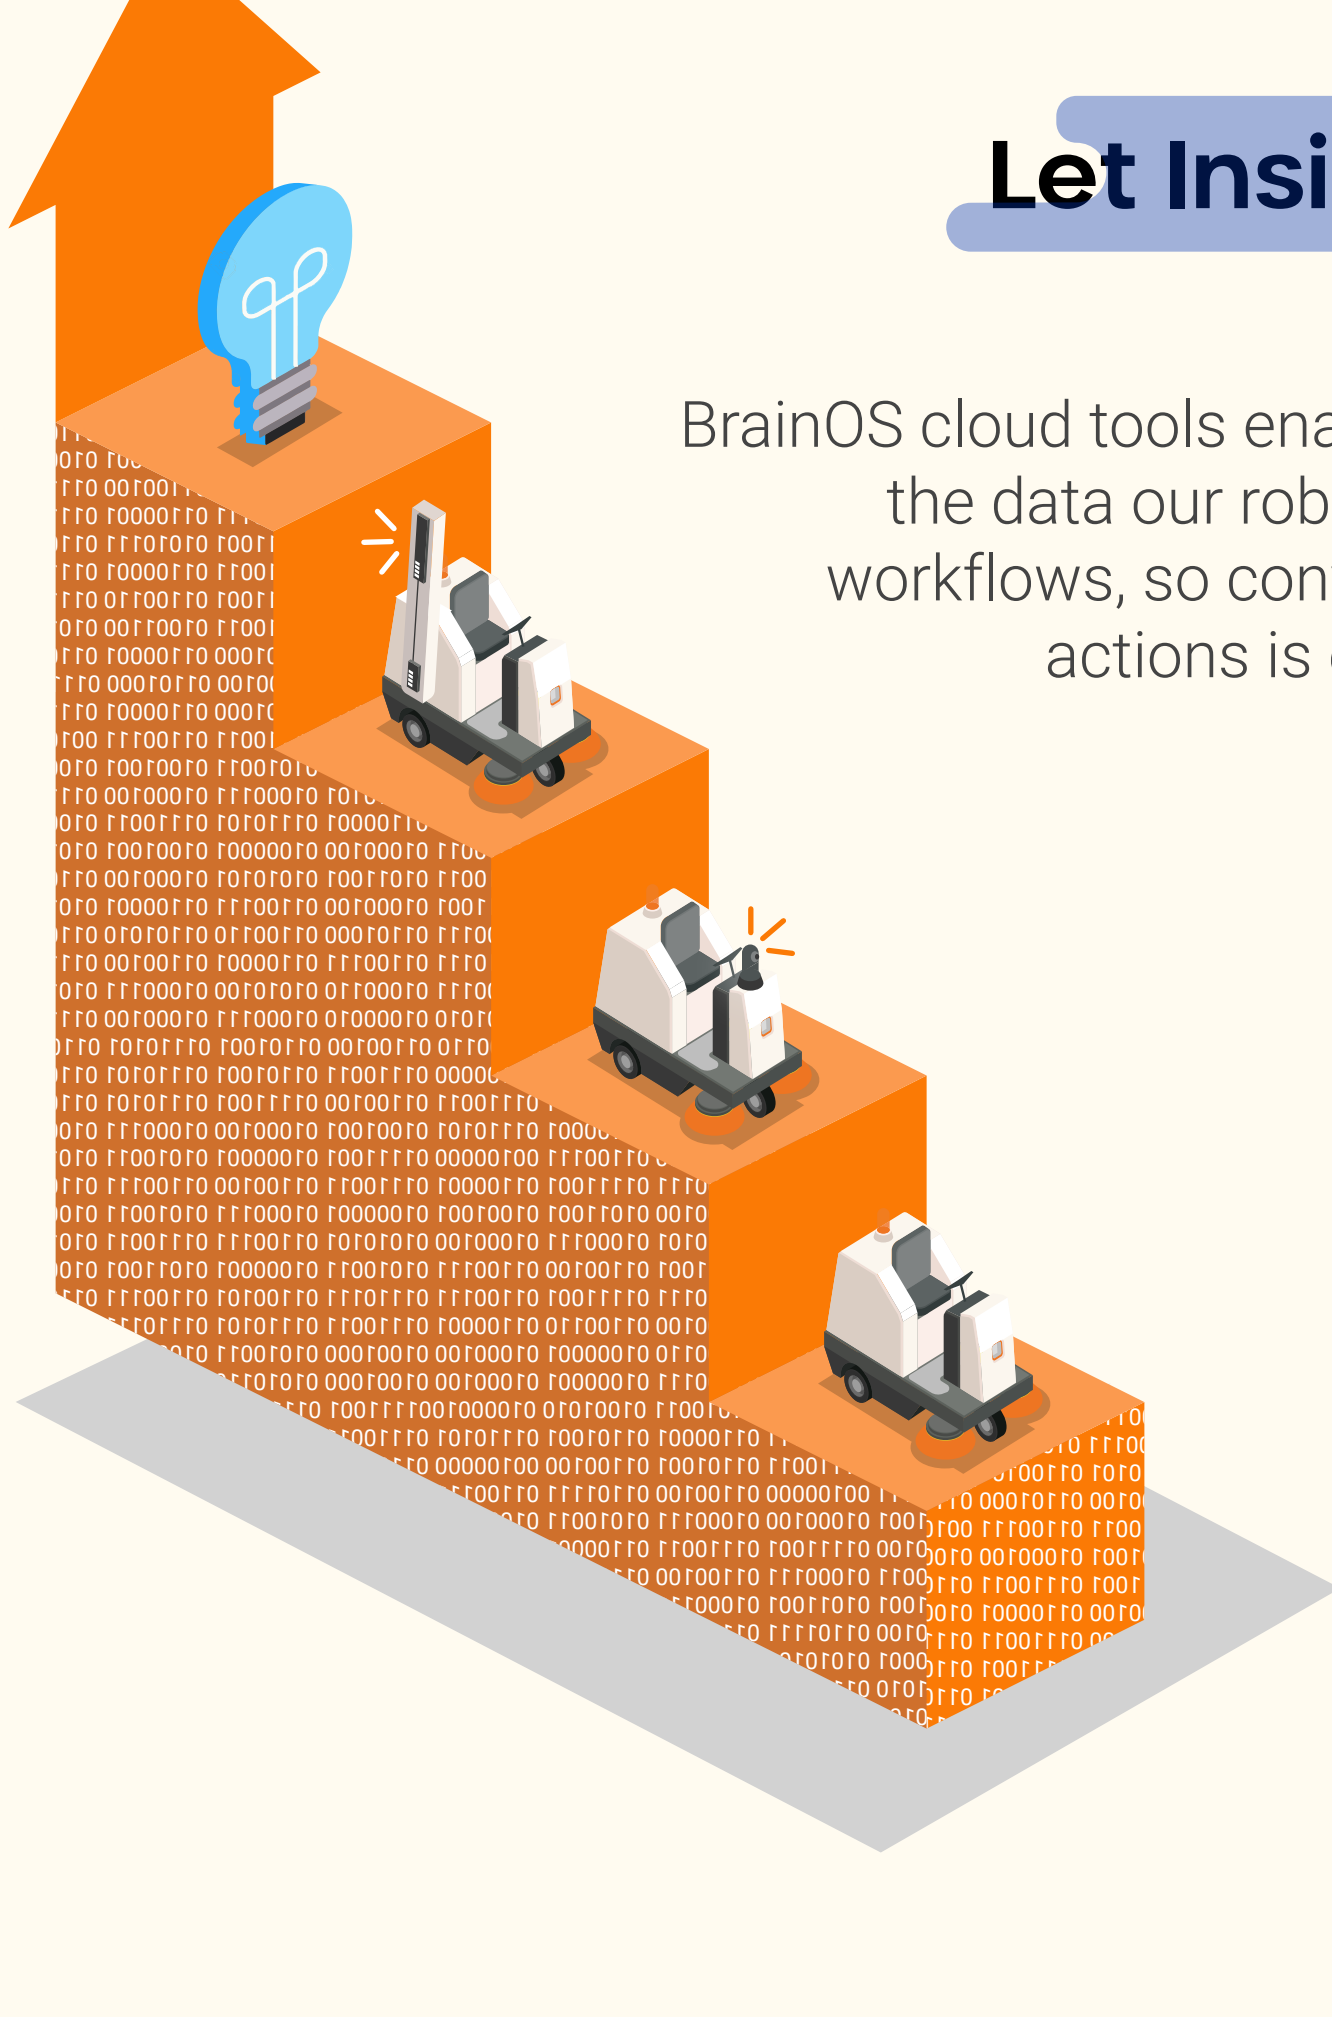

Added 'Sense' of Purpose

The BrainOS platform allows you to add new applications to your cleaning machine that consistently, efficiently, and accurately capture and deliver environmental insights.

Let Insights 'Flow'

BrainOS cloud tools enable you to integrate the data our robots collect into your workflows, so converting insights into actions is easy and seamless.

Getting Started Is Easier Than You May Think

1 Recognize the need for smarter, more sustainable operations

At a time when labor availability is at an all time low and wages continue to increase, companies must look for smart and sustainable solutions.

2 Select an automation partner

When considering a partner, it is always a smart decision to go with the industry leader! We have deployed more robots than any other company, making BrainOS powered robots the most trusted and proven solutions available to you.

3 Talk to a solutions expert

One size does not fit all. Thankfully with the BrainOS platform, you can select from a variety of robotic solutions that will best fit your facility.

4 Demo

Demo one robotic floor care machine in one location.

Pilot 5

Run a pilot with one robotic floor care machine in one location.

6 Scale the pilot

Scale your pilot with multiple robotic floor care machines in multiple locations.

Deploy 7

Now that you see the benefits, rollout multiple robotic floor care machines across your locations.

8 Add more robotic capabilities

Repeat process with new add-on applications.
